

Client Contractor National Safety Group (CCNSG) National 2 day course

Aims

To provide basic information and areas of responsibility for health, safety and environment.
To understand the implications of hazard recognition/risk assessment and the effects on individuals and the employer.
To demonstrate how individual behaviour can help reduce accidents.
The course as a whole is an “awareness” module, none of the sections are exhaustive of information and legislation, some of the delegates may have additional material to share on subjects, especially if they are trained and qualified on the subject.
It is important to stress that after completion of this course, the delegates are not trained and competent to complete all of the work tasks covered. All work tasks will vary on the environment at the time, as well as other factors.

Objectives

At the end of the course each delegate should be able to:

Realise the importance of the Safety Passport itself, as well as the importance of the engineering construction industry as a whole.
Have an awareness of health and safety at work as well as what their employer and they must do to abide with governing laws.

Programme content

4 sessions split over 2 days

Safe behaviour at work

An understanding of safe behaviour at work and its importance.

Safe systems at work

Gain an understanding of a safe place of work, and the regulations which govern this and the specific work tasks they cover, such as Manual Handling or Confined space entry.

A safe place of work

An awareness of safe systems, designed to make our everyday work safer, such as risk assessment and permit to work.

Safety problems and safe solutions

An understanding of safety problems and safe solutions and their role in this, including RIDDOR reporting and the accident book

Programme may be subject to change without prior notification

Safety Passport

Successfully completing all assessment papers will result in a safety passport being issued. The passport is valid for 3 years and can be refreshed anytime during the 3 months before or after the expiry date. However some sites will refuse access if contractors present an expired safety passport.
