

Client Contractor National Safety Group (CCNSG) Renewal

Aims

To refresh delegate's knowledge of the subject matter covered in the National 2 day course.

The course as a whole is an "awareness" module, none of the sections are exhaustive of information and legislation, some of the delegates may have additional material to share on subjects, especially if they are trained and qualified on the subject.

It is important to stress that after completion of this course, the delegates are not trained and competent to complete all of the work tasks covered. All work tasks will vary on the environment at the time, as well as other factors.

Objectives

At the end of the course each delegate should be able to:

Realise the importance of the Safety Passport itself, as well as the importance of the engineering construction industry as a whole.

Have an awareness of health and safety at work as well as what their employer and they must do to abide with governing laws.

Programme summary

3 sessions in total, with 3 written assessments throughout the day:

Session 1

How much do you remember?
The Impact of an accident
The Importance of Safe Behaviour
Legal Framework

Session 2

Risk assessments, types and uses
Permit To Work, hot work and fire
Site transport
Working at height and lifting operations
Work equipment and electricity

Session 3

Confined spaces, safety signs and signals
Hazardous substances, manual handling
Noise, vibration, excavations, hazards and control measures
Good Practice, hazards and controls

Programme may be subject to change without prior notification

Safety Passport

Successfully completing all assessment papers will result in a renewed safety passport being issued. The passport is valid for 3 years and can be refreshed anytime during the 3 months before or after the expiry date. However some sites will refuse access if contractors present an expired safety passport.
