

Confined Space Supervision

Aims

The aim of this course is to provide those who supervise and work in confined spaces, with a thorough understanding of the health and safety requirements specific to this high risk area of work.

Objectives

At the end of this course each delegate should be able to:

- Outline the legal requirements specific to confined space work
- Identify limitations and weaknesses in human behaviour which may lead to accidents in confined spaces
- Recognise those areas within the company that would constitute a confined space
- Outline the risks associated with confined space work
- Select appropriate risk reduction control measures
- Identify the main elements of safe systems of work and emergency plans

Programme Content

Introduction

The Law and Confined Space Work

Human behaviour & accidents

Syndicate exercise

Confined spaces

Definition and specified risks

Syndicate exercise

Risk assessment

Syndicate exercise
