

## NEBOSH International General Certificate in Occupational Safety and Health

### What is the NEBOSH International General Certificate?

The National Examination Board in Occupational Safety and Health (NEBOSH) is the leading UK examination authority in this field rapidly gaining respect on a world stage. **The International General Certificate is for those who have local responsibilities for health and safety and require an internationally recognised measure of competence in this field.** If you advise others in any capacity on health and safety issues, or if you are a safety adviser seeking initial training for your role the course will provide a solid foundation in the principles of health and safety.

Subject to experience successful candidates will be eligible for Associate Membership of the International Institute of Risk and Safety Management and/or membership of the Institution of Occupational Safety and Health at the grade of Tech IOSH.

### KeyOstas style

We have a proven track record in NEBOSH training with enviable success rates. We limit the number of people on our courses so that we can give personal attention to **your** learning needs. This limit also means that the learning process is lively, interactive and enjoyable. Our broad experience allows us to deal with the syllabus in an interesting and practical way and relate the subject to your experience.

### The programme

You will learn about effective policies, organising your business, investigating accidents, risk assessment and risk management. It's a practical programme which illustrates common sense approaches to managing this vital function within a business. Find out how to deal with machinery safety, hazardous chemicals, noise, electricity, fire and radiation, and put effective safety management at your fingertips.

### KeyOstas notes

Everyone attending the programme gets a comprehensive reference manual covering, in depth, all of the subjects included in the training programme. These notes are acclaimed by all who read them and prove to be a valuable source of guidance long after your training is complete.

### Objectives

At the end of the programme you should be able to:

- Identify and assess typical hazards in the workplace
- Recommend remedial action to control workplace hazards
- Investigate accidents and recommend preventative measures
- Explain human and organisational influences on health and safety
- Describe potential ill-health effects arising from work environments
- Devise control strategies for substances hazardous to health

A full list of objectives is available on request

### Assessment

For any qualification to be worthwhile it must be hard earned. It must give the owner a sense of achievement and pride. This does not come easy. The assessment criteria, laid down by NEBOSH, requires the successful completion of two formal written examinations at the end of the programme and a practical workplace assessment.

### Exam technique

We won't leave you stranded when it comes to the final test. Throughout the programme our trainers will help you to prepare for the examination by developing your question reading and answering technique.
