

IEMA Environmental Sustainability Skills for the Workforce is one of a suite of courses, under the banner of Environmental Sustainability Skills for the Workplace, which is a new development programme aimed at non-environmental specialists. This a 1-day course.

The Environmental Sustainability Skills for the Workforce 1-day course is perfect for those working in any job role across all sectors, to ensure that environmental sustainability is embedded into all job roles of a company.

The course covers the main environmental risks and opportunities facing organisations; the importance of resource efficiency; the impacts of pollution, prevention, control and legislation; the impact of transport; and knowing how employees can support environmental sustainability.

### Outcomes:

- The Learner will have knowledge and understanding of the main environmental and economic risks and opportunities
- The Learner will have knowledge and understanding of compliance obligations and business drivers for change
- The Learner will have knowledge and understanding of the main potential impacts on environment and sustainability
- The Learner will have knowledge and understanding of how to improve environmental performance

### Fees
